We are quite interested in the pursuit of a national water-efficient labeling program. I have read with interest of the successful and popular AAA (now 5A) program in Australia. Our customers have shown a tremendous interest in, and willingness to purchase, low-water washing machines over the past 6 years. One of the reasons is that there has been some type of rating system that informs them of the resource demands of the various machines. That type of performance information is much more difficult to obtain for dishwashers, evaporative coolers, and other devices.

We appreciate and support your efforts.
